*Professional Technician's
Seminar Series*

PTS31: Advanced Exhaust Gas Analysis

- A good understanding of 5-Gas Emissions is an essential part of any driveability technician's toolbox.
- This one night class guides you technician through a step by step process to quickly and accurately diagnose cars using an emission analyzer.
- The course is taught in an easy to use format that is unlike any Gas Analysis course you have ever attended!

Here's what's included:

- A proven approach to NOx failures and the importance of identifying the amount of reduction to be expected with each component.
- Participate in case studies of problem vehicles and work together on solutions.
- How to use your analyzer as a diagnostic tool.
- Verifying customer mileage complaints with a 5 Gas Analyzer.
- How to identify whether a car only needs routine maintenance, or has major driveability problems in less than 10 seconds.
 - A workbook that contains quick techniques, worksheets, and example readings will allow you to review the techniques back at the shop.
