

Professional Technician's Webinar Series

Air Conditioning Update 2010

Each year there are changes to vehicle HVAC systems that require new service techniques and tools. Technicians must keep up with new technology or costly mistakes can be made.

- Learn the latest information on new refrigerants, tools, and service issues
- Prepare for the new season by refreshing your diagnostic and service techniques
- Reduce comebacks by performing some simple checks after a repair
- Be prepared to determine if the problem is failure, worn out components or a system problem
- Hone your Skills to diagnose vehicles

Attend This 45-60 Minute Webinar To:

- Learn the types, operation, failure modes, and diagnosis of A/C systems.
- Temperature equipment testing to verify repair to eliminate comebacks
- Learn a simple process using data to verify repair
- Participate in live polls and Q&A

This class is presented online in a "live" virtual classroom environment with trainers in attendance. You will have the opportunity to ask and answer questions during and after the presentation.
