Dan Marinucci' s

TOYOTA DRIVEABILITY DIAGNOSIS SEMINAR

Dan Marinucci, certified technician, tech writer and monthly columnist for MOTOR Magazine and TIRE BUSINESS. Dan has presented technical training seminars throughout the US and Canada for the past 15 years.

WOULD YOU BE ABLE TO DIAGNOSE THESE PROBLEMS?

- A Tacoma truck hesitates severely during acceleration and has stored DTC P0171. The fuel pump and fuel filter are both new. What should you check next on this truck?
- A V6 4Runner idles smoothly but misfires under load and has stored DTC P0300. What's the first thing you should check on this engine?
- A Corolla engine pings (spark knock) during light throttle driving and has stored DTC P0171. What should you check first on this car?

Not sure? Dan shows you quick solutions to these and other common and not-so-common Toyota problems.

DATE: October 27 & 28, 2008 **TIME:** Dinner @ 6:00 pm / Seminar 6:30 to 10 pm

LOCATION: **SMITH AUTO PARTS, 2545 N. Blackstone, Fresno, CA 93703**
