

Professional Technician's Seminar Series

PTS78: Mode \$06 and Beyond

- Mode \$06 and Beyond: Getting the Most from Your Scan Tool
- This one night class is designed to help you diagnose accurately and efficiently using your scan tool
- The use of both OE and aftermarket tools will be demonstrated and compared while diagnosing a variety of vehicle problems
- Interactivity and plenty of case studies will help you to sharpen your diagnostic skills
- Respond to questions and diagnostic decisions using the wireless reply system

Here's what's included:

- The class covers the different modes of scan tool operation, with a detailed explanation of their use, and specifically how to effectively use Modes 6 and 8
- Examples of ways to use you scan tool efficiently while leveraging all of the data and test modes that are available to you
- Information to help you decide if your current scan tool will meet your diagnostic needs in the future
- The latest information on Generic CAN data as required by CARB
- Real world case studies from working technicians to demonstrate techniques that you will be able to use in your shop the next day
- Learn to use more of your tools features to speed diagnosis
