# Professional Technician's Seminar Series

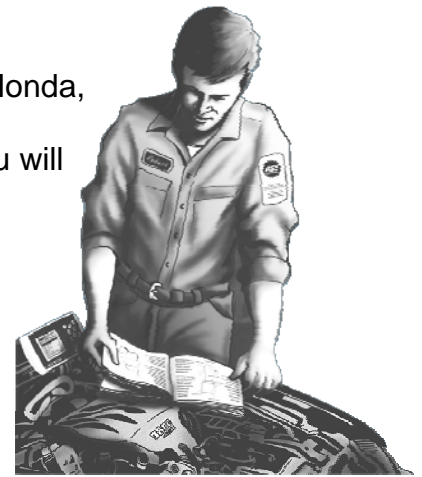

## PTS62: Hybrid Vehicle Technology

- This new seminar is designed to prepare the automotive technician to service Hybrid vehicles.
- With annual sales exceeding 160,000 units, this class is imperative for today's technician.
- Show your customers that your shop is ready for cutting edge vehicles and technology.

### Here's what's included:

This one-night interactive training program covers Ford, General Motors, Honda, and Toyota vehicles from 1999-2006. Learn the truth about safety and operation issues that you need to know when servicing these vehicles. You will learn about the following:

- 144, 274, 300, and 500 volt systems!
- Regenerative Braking
- Parallel and Series Hybrid Drive Systems
- High Voltage Components and Service
- Jump Starting
- Battery Charging
- Electric Power Steering and HVAC Systems
